Nahid Usha

Front-End Developer | Python Developer (Django)

Dhaka | +8801750708865 | nahidusha@gmail.com | nahidusha.netlify.app

Passionate programmer skilled in Front-End (HTML, CSS, JavaScript), Framer, and Django. Strong foundation in OOP (Python) and problem-solving (C/C++), with 300+ problems solved on Codeforces. Built several projects applying core development concepts.

TECHNICAL SKILLS

- C++
- Data Structure
- Algorithm
- Oop
- Python
- Django
- MySQL
- PostgreSQL
- Html
- Css
- Javascript
- React
- Framer
- Git
- Github
- Vs Code

EXPERIENCE

Softvence Agency — *Front End Developer* *August 2025 - Present*

- Joined as a Frontend Developer, quickly learned Framer, and began contributing to real projects.
- Successfully completed a 2-month probation period and was made a permanent team member after delivering strong results, including ~40 live Framer projects with consistently positive client feedback.
- Later promoted to Co-Team Leader due to performance and leadership potential, and currently serving in that role.

EDUCATION

Dhaka International University — *B.SC. IN CSE* *July 2021 - August 2025*

- Completed B.Sc. in Computer Science and Engineering, gaining knowledge in core computing principles, problem-solving, software development processes, and understanding of how modern digital systems and applications are designed and built. Published one research paper as part of academic work.

PROJECTS

Bank Management System — (Python OOP) *July 2021 - August 2025*

- Console-based banking app with User & Admin panels. Features: account creation, deposit/withdraw, balance transfer, transaction history, loan system (max 2 times per user), global loan toggle, bankruptcy flag, and random account ID generation. Demonstrates inheritance, encapsulation, and dictionary-based data storage.
