Nahid Usha
Programmer Developer

I'm passionate in programming that's why have explored Frontend (Html,Css Frameworks,Js) and Backend with Django Besides i involved myself into some others programming stuffs object oriented programming , and problem solving that's why i am familiar with python for oop and C,C++ for problem solving . Done some basic project with oop and solved more than 300 basic problems on different online judges mainly on codeforces that's give me huge confident when i got myself into development and make me feel that i can do it

Bangla

Programming Activities

Programming Contest - Fall Fest 2022

Runner Up

This was held at the end of 2022. There were many events, including a programming contest and an IT quiz, which I participated in. Although participation was the main goal, I was lucky enough to become the runner-up in both the IT Quiz and the Programming Contest.

IT Quiz - Fall Fest 2022
Runner Up

Programming Contest - Spring Fest 2022
Second Runner Up

Projects

NextgenLibrary

- Live Link : https://nextgenlibrary.onrender.com/

NextGen Library is a Django-powered web application that allows users to register, log in, browse books, borrow them, and manage comments with full CRUD operations. It offers an organized and interactive digital library experience.

Cry Analysis

- Live Link :https://crydetection.onrender.com/

Cry Detection is a machine learning-based web app that analyzes baby cries to identify reasons like hunger or discomfort. Built with Django and a trained model saved in .pkl format for real-time prediction.

Madinatul Ulum

- Live Link :https://madinatululum.onrender.com/

Madinatul Ulum is an Islamic educational platform offering online access to religious courses, resources, and learning materials. It also features an online admission submission form for new students.
